JULIA CHO (STUY ANESTHESIOLOGY SOCIAL MEDIA MANAGER)

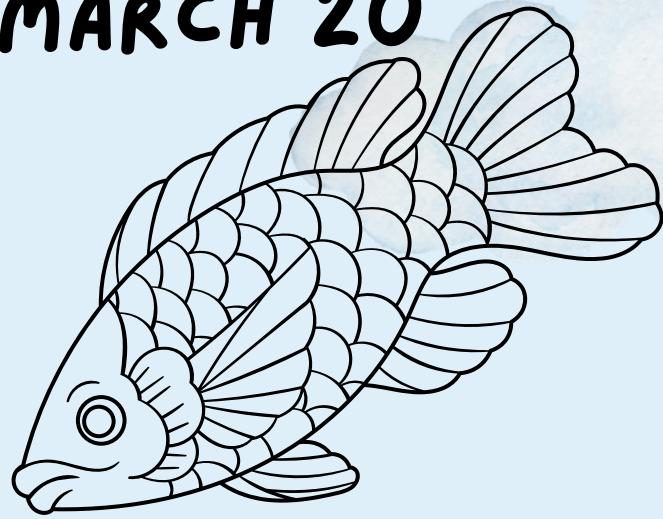

Hi! I'm Julia, the social media manager of the StuyAnesthesiology Club. My interest in medicine began during the pandemic when health became a major global concern. Witnessing the impact of the crisis highlighted the importance of healthcare and inspired me to learn more about the field. While researching different specialties, I became particularly fascinated by surgery—until I realized the crucial role anesthesia plays in every procedure.

That discovery sparked my interest in anesthesiology, and I knew I wanted to learn more. Joining the StuyAnesthesiology Club was the perfect way to dive deeper into this field. As a social media manager, I aim to raise awareness about the importance of anesthesia in healthcare while also learning alongside my fellow board members and club members. We make the experience fun and engaging through interactive activities like trivia and games—turning a topic rarely covered in class into something exciting and accessible!
